

Environmental Policy;

BIAS, which adopts the management mentality of "People First", has accepted the protection of the environment as an indicator of respect for the society, beyond legal requirements. Based on the awareness that the protection and improvement of the environment we live in is an integral part of our business; We aim to minimize the quality and environmental impact of our products, inputs and activities. Therefore;

- ✚ To control, reduce and prevent the factors that cause environmental destruction with the idea of not polluting the environment instead of cleaning it, and to spread this principle all around us,
- ✚ To prevent pollution at its source and to reduce the negative effects of our activities on the environment,
- ✚ To continuously improve our environmental performance and quality, to contribute to raising the environmental awareness of our employees, suppliers, customers and society,
- ✚ To provide the necessary human resources, technology and financial resources to reduce our impact on the environment,
- ✚ To use global resources effectively by following the developing environmental protection systems and techniques,
- ✚ It is our goal to take advantage of raw material sources that do not carry pollution and health risks, taking into account the environmental effects of our products that will create lifelong hazards at the design stage.
- ✚ To develop employees by providing awareness trainings about environmental awareness,

Aydın KUNTAY
General Manager
