

Traffic Sign Detection and Localization

ADAS Ground Truth Solutions

Traffic Sign Location Measurement System: Accurate location measurement of traffic signs on roads.

System Specifications:

- Measurement Range: ~50m
- Position Accuracy: ~0.05m (30m/s speed)
- Tracking based on Lidar Point Cloud
- Class detection accuracy (>%98)

Applications:

- Validation of Intelligent Speed
- Assistance System
- ADAS DUT performance testing

About Mobias

MOBIAS offers engineering, test and measurements services such as ADAS Testing, NVH, Durability. Our services cover design, development and testing. We offer solutions to process connected vehicle data on cloud with AI powered algorithms. Example applications are hazardous location warning and remote testing monitoring. We offer various sensors, hardware kits and test systems which you might need during development phase.
